

Kolkata Chapter

We are so happy to have you here!

who am I?

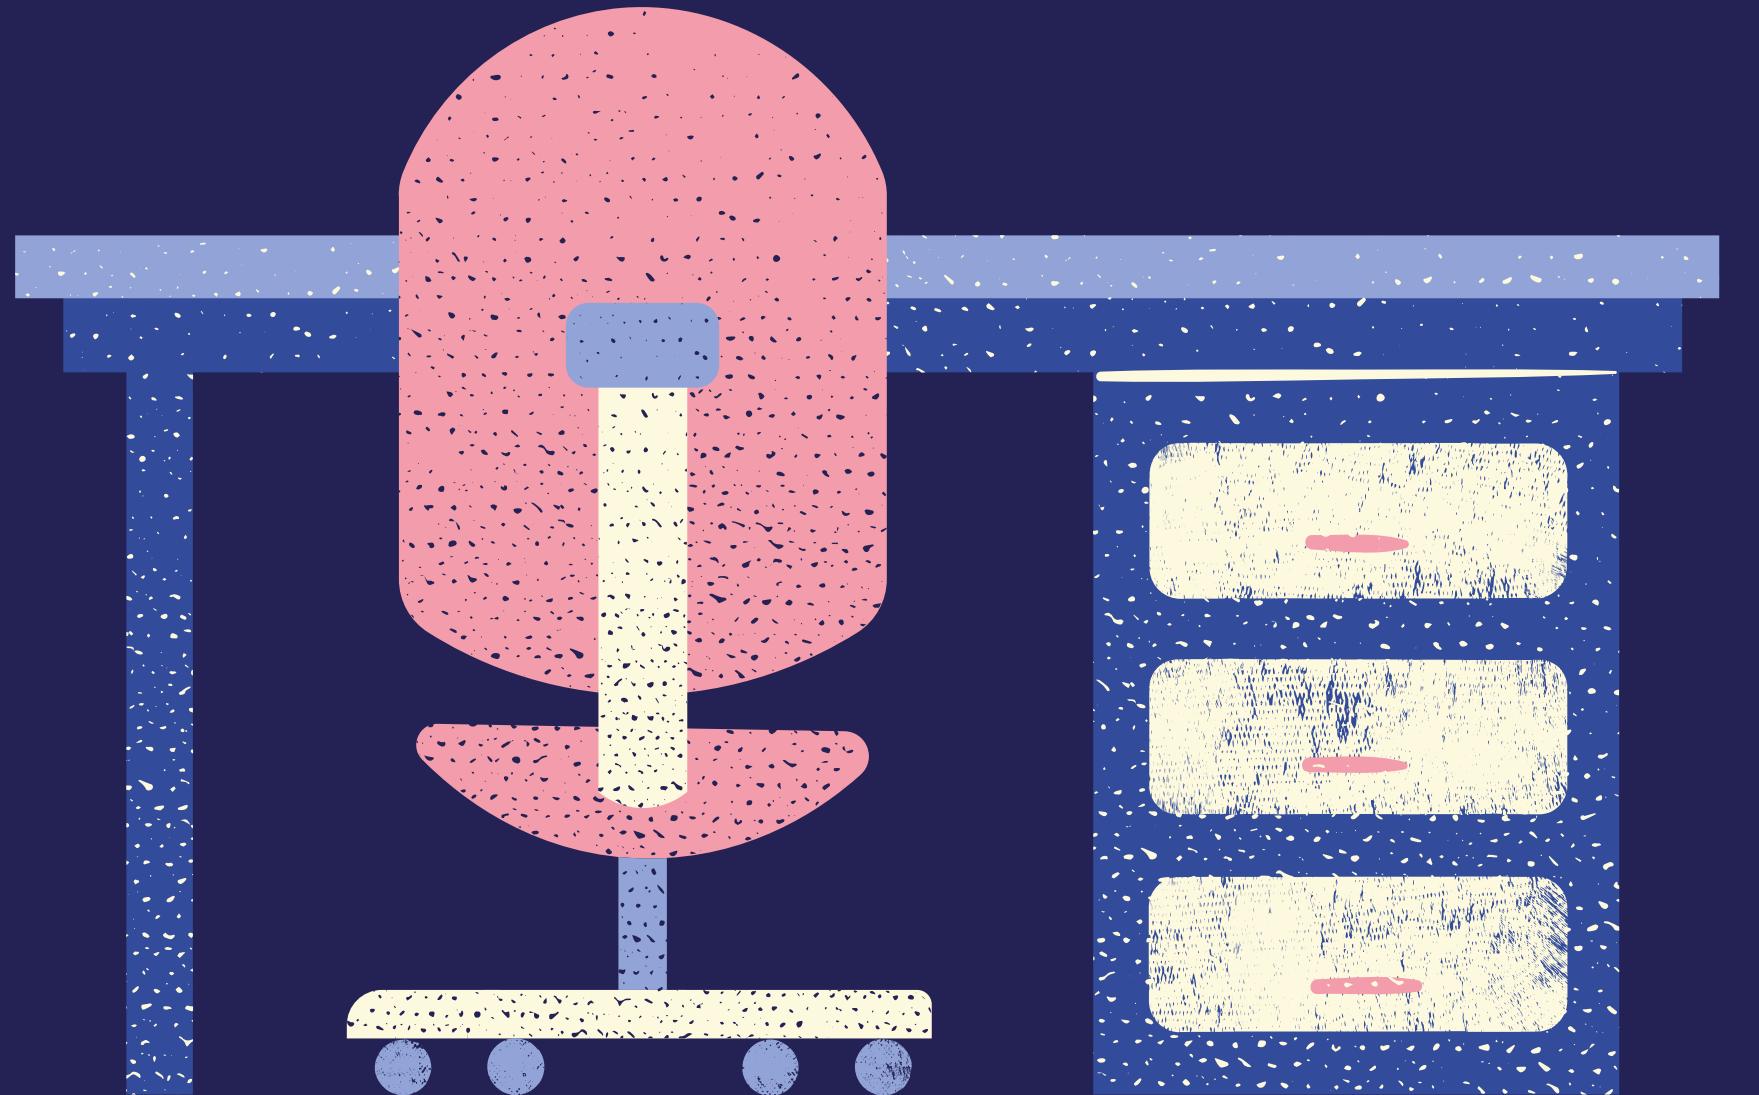

I am Jasleen Kaur Sondhi.

I enjoy painting and reading when I am offline. I love meeting new people and have
mentored over 80 people.

Incoming Data Science Student|MLSA| Triple Majors in Physics, Maths and Computer
Science.

Here are some of my plans for the Chapter!

We will also have a brainstorming session after this presentation where we can come up with new ideas together!

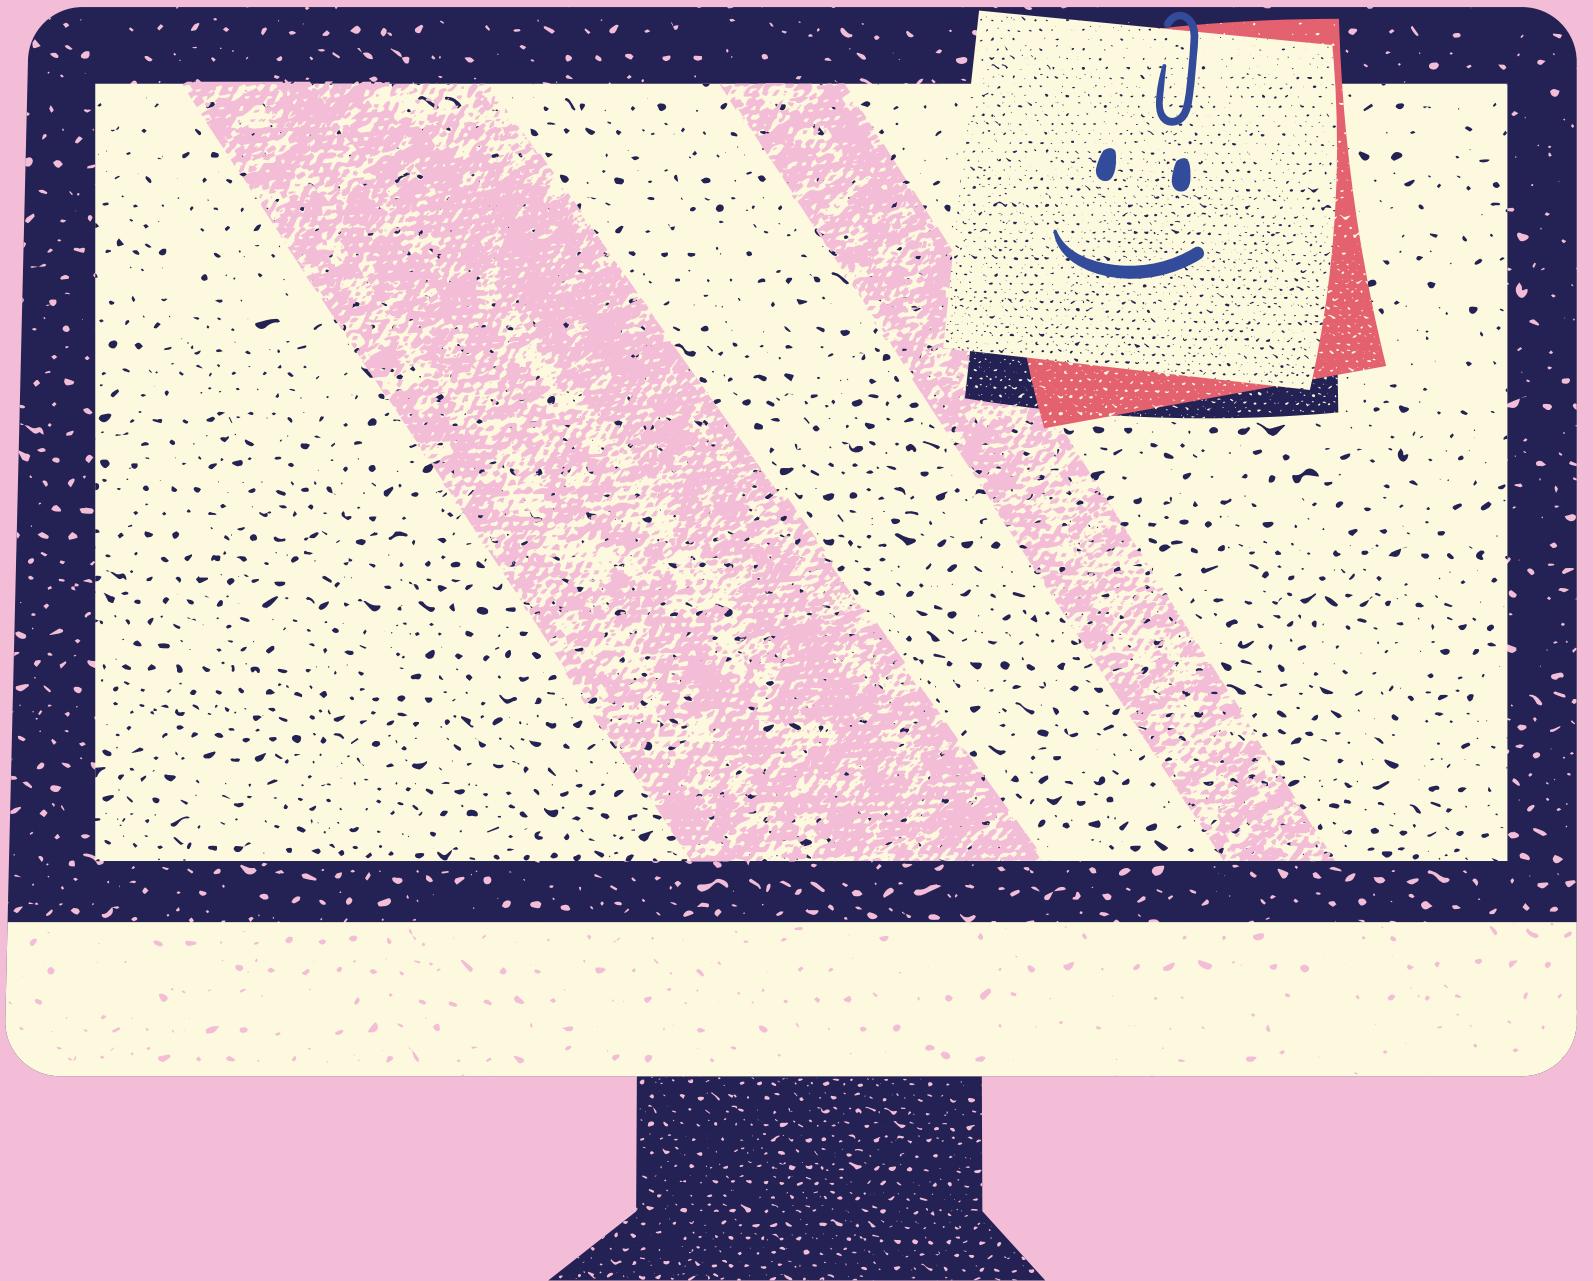

Focus Study Sessions

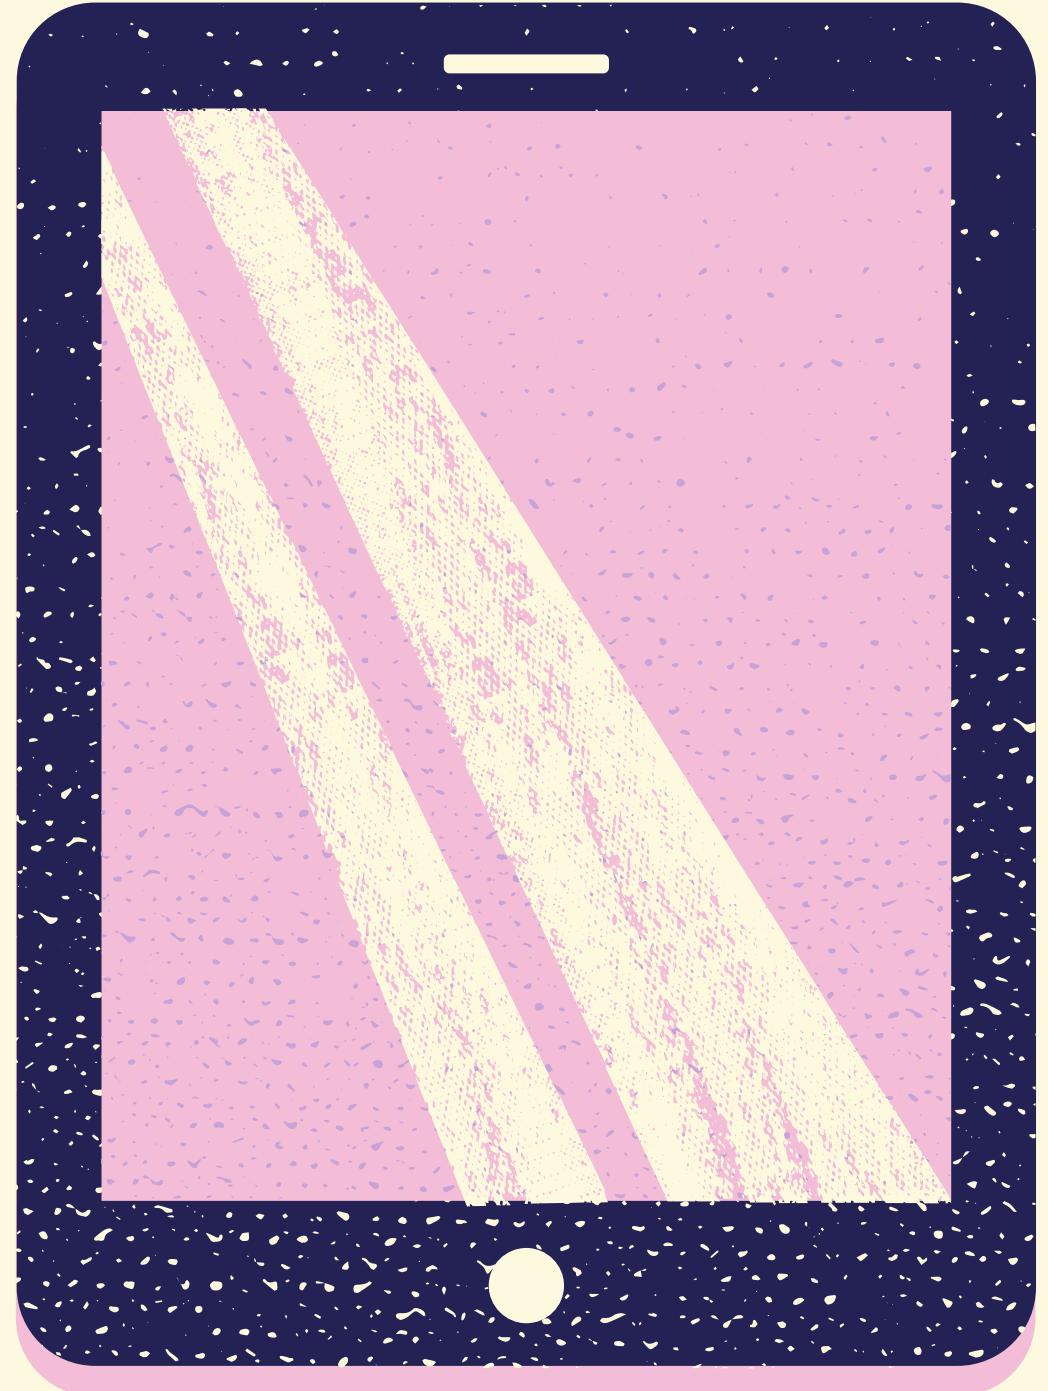

We are all tired of studying remotely and alone.

Let's fix that by studying with your study buddies from the community. Also, discuss about your progress.

Learn new tech together.

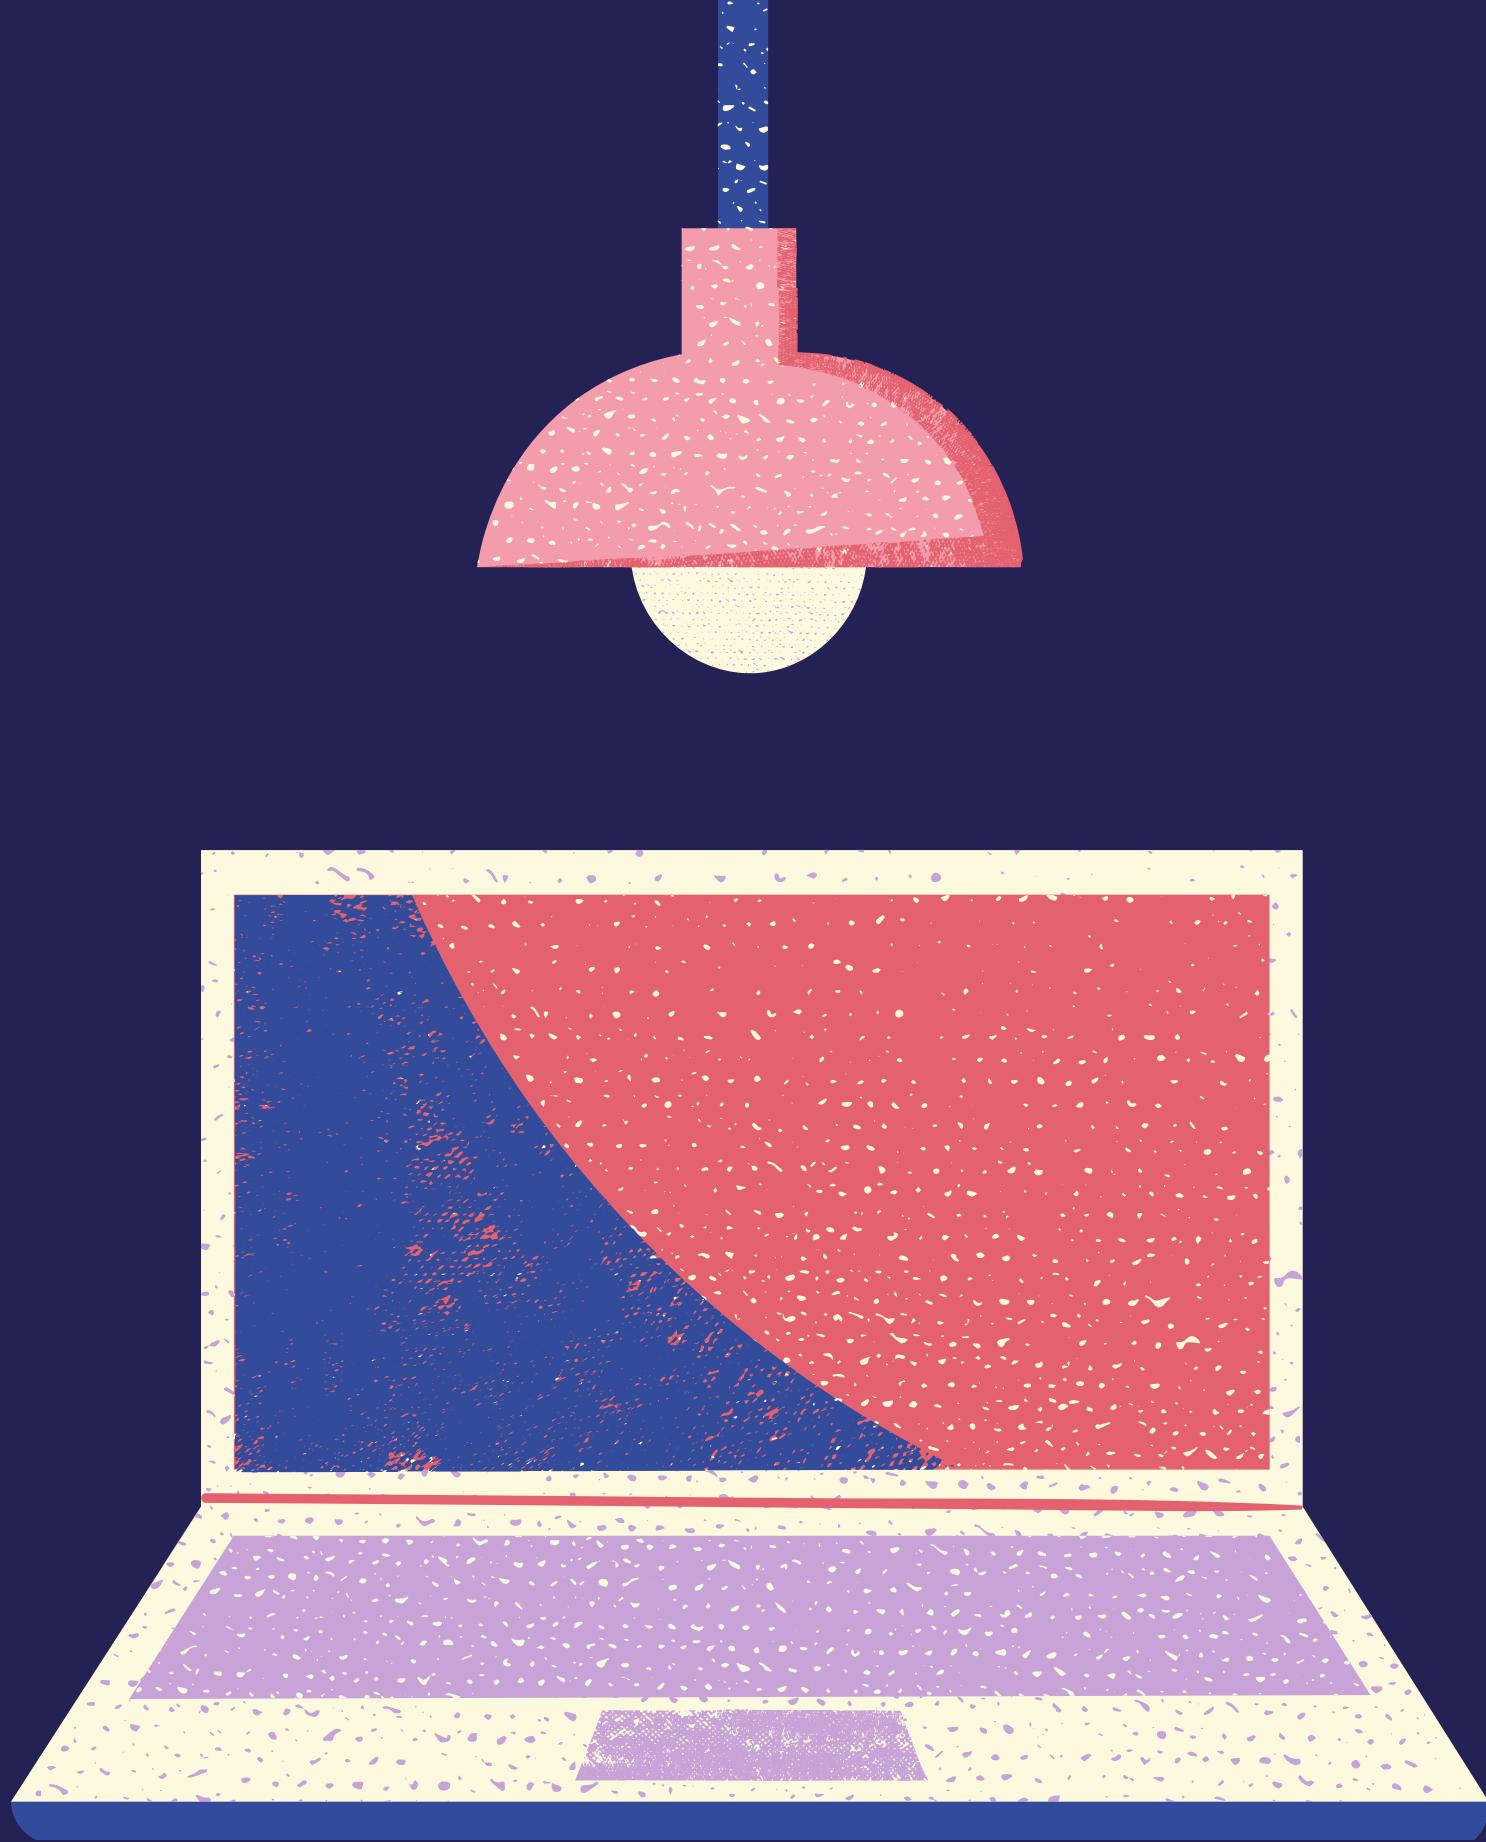

- Learn new technologies together.
- Teach things you know.
- Do projects together.

Coding Lessons/Quizzes/ Games

Learning should be fun. And that's how it will be at Kolkata
Codecademy Chapter.

Guest Talks

We will invite guests to come speak to us and share their knowledge.

Network and Grow

Interact with people in the community, learn from their successes and support each other on the journey to become the best version of yourself.

Impact high school students.

I would need your help with this one.

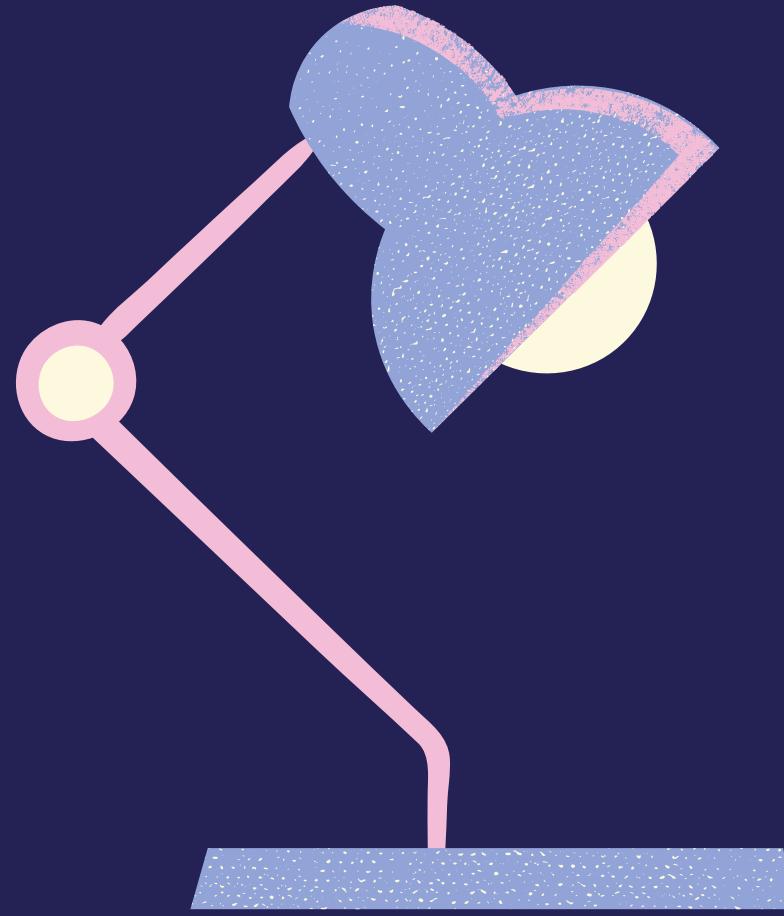

One should always give back to communities too. So let's do our part by teaching coding to someone who really wants to learn.

Manage the chaos.

Find yourself a quiet spot at home to attend your meeting. Turn off the volume of your TV or music player so you can focus.

Close the door to avoid uninvited party guests from arriving in the background. While it's not completely frowned upon, it may distract your teammates.

Take advantage of virtual backgrounds too if your meeting app supports it to instantly turn a messy space into a clean and professional one.

Thank you for your time!

Let's make this community a success together. Encourage your friends, classmates and colleagues to join our chapter :D
